Coimbatore

TECHNICAL SKILLS

- Full Stack in Python
- PHP
- Frontend(HTML,CSS,Js)
- React
- Canva
- Figma
- Intermediate in Python
- Embedded in C
- IOT

PROFILE

Aspiring Full Stack Developer and B.Tech Information Technology student with a strong interest in Python programming and web development. Experienced in full-stack development through internship and academic projects. Possess strong problem-solving, teamwork, and communication skills. Passionate about learning new technologies and building innovative, user-friendly software solutions.

PROJECT

2025

Vital Guardian Multi-Infant Monitoring System

Developed an IoT-based healthcare monitoring system to track vital parameters of multiple infants, including heart rate, body temperature, oxygen saturation (SpO₂), and respiration rate. The system provides real-time monitoring, automated alerts for abnormal conditions, and centralized data management, enabling healthcare professionals to ensure infant safety and improve patient care through timely interventions.

2026

A Data-Driven Support System for Climate-Responsive Seed and Irrigation Recommendation in Precision Farming

Nehru Institute of Engineering and Technology

A Data-Driven Support System for Climate-Responsive Seed and Irrigation Recommendation in Precision Farming: Developed a web-based precision farming platform that integrates weather forecasting, soil analysis, seed recommendations, and irrigation planning into a single system. The project aims to assist farmers in making data-driven decisions, improving crop productivity, optimizing water usage, and supporting sustainable agricultural practices.

Conference

2025

Next-Gen Water Quality Tracking With Automated Alerts

Next-Gen Water Quality Tracking with Automated Alerts: Presented a conference paper on an intelligent water quality monitoring system that detects microscopic impurities in water. The system provides real-time monitoring and automated alerts for contamination, enabling timely intervention and improving water quality management and safety.

KEY SKILLS

- Communication
- Teamwork
- Time management
- Problem solving
- Quick Learner
- Adaptability

Vital Guardian Multi-Infant Monitoring System

Developed an IoT-based healthcare monitoring system to track vital parameters of multiple infants, including heart rate, body temperature, oxygen saturation (SpO₂), and respiration rate. The system provides real-time monitoring, automated alerts for abnormal conditions, and centralized data management, enabling healthcare professionals to ensure infant safety and improve patient care through timely interventions.

PAPER PRESENTATION

2025

Design and Development of a Smart Soil Testing Vending Machine Using IOT Industry 4.0 Sensors and AI Recommendation System for Sustainable Farming

Design and Development of a Smart Soil Testing Vending Machine Using IoT Industry 4.0 Sensors and AI Recommendation System for Sustainable Farming: Developed a smart soil testing system that uses IoT sensors and AI-driven recommendations to analyze soil health. The solution helps farmers make informed decisions on crop selection, fertilizer usage, and sustainable farming practices.

ACHIVEMENTS

- Best Paper Award in International conference
March 27-29,2025
- National Level Hackathon in IIT Madras
- New Gen Startup Innovation

AWARDS

- IOT and Robotics(Mindenious)Aug 2025
- IOT and Robotic(Corizo) Sep 2025
- Introduction to Industry 4.0 an Industrial Internet of Things NPTEL(IIT Kharagpur)Jul-oct 2025
- Cloud Computing (Infosys Springboard)Sep-Nov 2025
- IOT (TRIOX Technology) Dec 2025- Jan 2026

Seminar/WorkShop

Cyber Security

March 2025

Nehru Institute of Engineering and Technology,coimbatore

Internship

Dec-Jan

Trixo Technologies

IoT & Embedded Systems Intern

Completed a one-month internship in IoT and Embedded Systems at Trixo Technologies. Gained hands-on experience in embedded system fundamentals, microcontrollers, sensors, and IoT-based applications. Worked on interfacing hardware components, understanding real-time data acquisition, and implementing basic IoT communication concepts. Developed practical knowledge of embedded programming, hardware-software integration, and troubleshooting techniques while working on industry-oriented projects.

Elcodamics

Software Development Intern

Completed a 3-month internship at Elcodamics, contributing to full-stack web development and AI-based application development. Worked on both frontend and backend technologies, including HTML, CSS, React, Python, PHP, and Node.js. Participated in designing and developing web application features, integrating backend services, and creating AI-powered tools. Assisted in CRM development, database management, testing, debugging, and deployment activities. Gained practical experience in software development life cycle (SDLC), teamwork, problem-solving, and delivering scalable business solutions.
